

Date: Jan. 09th, 2023**To whom it may concern;****Statement on details of the pulp used for products**

With reference to above, we are pleased to specify the details as follows.

- 1) "Slash pine" is the common name for the pine tree from which the cellulose
(Used for our AnyCoat-C, AnyCoat-P, AnyAddy) is extracted.
- 2) The scientific name is "pinus elliottii".
- 3) Slash pine grows in the southeastern United States, mainly in the coastal areas of Florida
and southern Georgia.
- 4) Slash pine likes the warm, humid climate and the sandy soils of these coastal areas.

Thank you.
